# The beauty of INNOVATION

## Our story

Rinox was founded in 1997 and employed eight people in its first year. Our company has grown significantly since then and today our team count is at eighty, and growing.

This longevity is owed in large part to the confidence and the satisfaction of our clients who demonstrate remarkable loyalty year after year.

PROMA XL - ASH CHARCOAL

# Style Story

Anouk Meunier

PROMA XL - SILVER WHITE

“Rinox stays on top of new trends. I really love the silver white color, it completely seduced us at first sight!”

Anouk Meunier - Host

# Anouk's pick

During our stay in Arizona, we fell in love with white slabs. We were delighted to find out that Rinox offered this color. The Proma XL paver completely transformed our backyard, and we are completely satisfied with the result. We adore our new dynamic landscaping; it's perfect for cocktails and sunny summer days!

Pavers

90mm

Whether they are installed for commercial or residential projects, the strength of 90mm pavers creates a durable project. They are used in driveways, and areas with heavy vehicle traffic.

 VIEW WITH THE RINOX EXP APP.

## Create majestic driveways

PROMA QUADRA

### Driveway paving stones. A daring choice.

Due to their durability, paving stones are known for their long lifespan. Perfectly suited for the comings and goings of vehicles, pavers remain stable and withstand the rigors of our climate.

The quality and design of Rinox pavers will add style and value to your home.

## 70mm

These versatile pavers are practical, durable and offer a variety of installation possibilities. 70mm pavers will seamlessly adapt to your outdoor space.

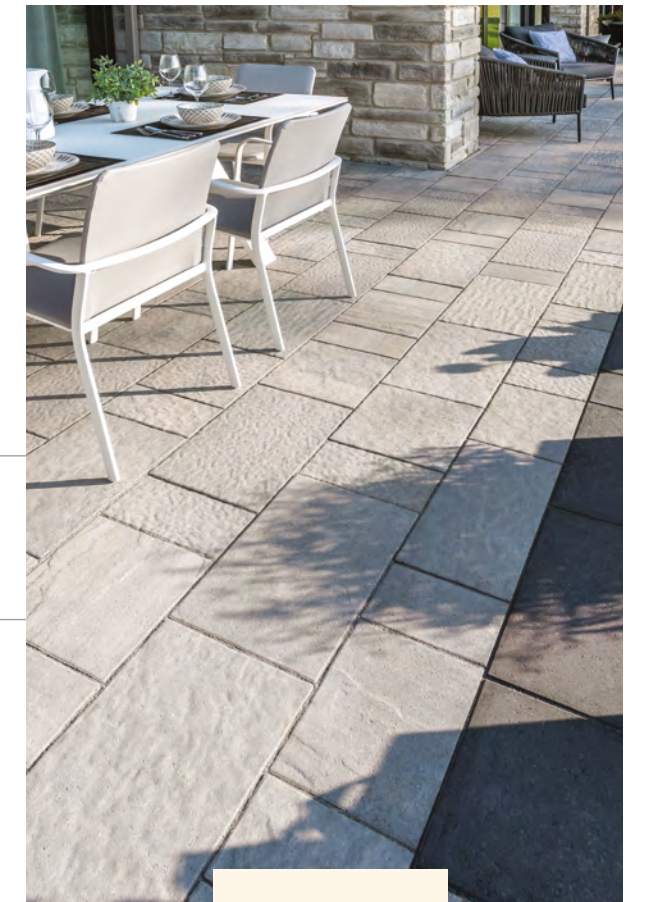

## Linear or modular...

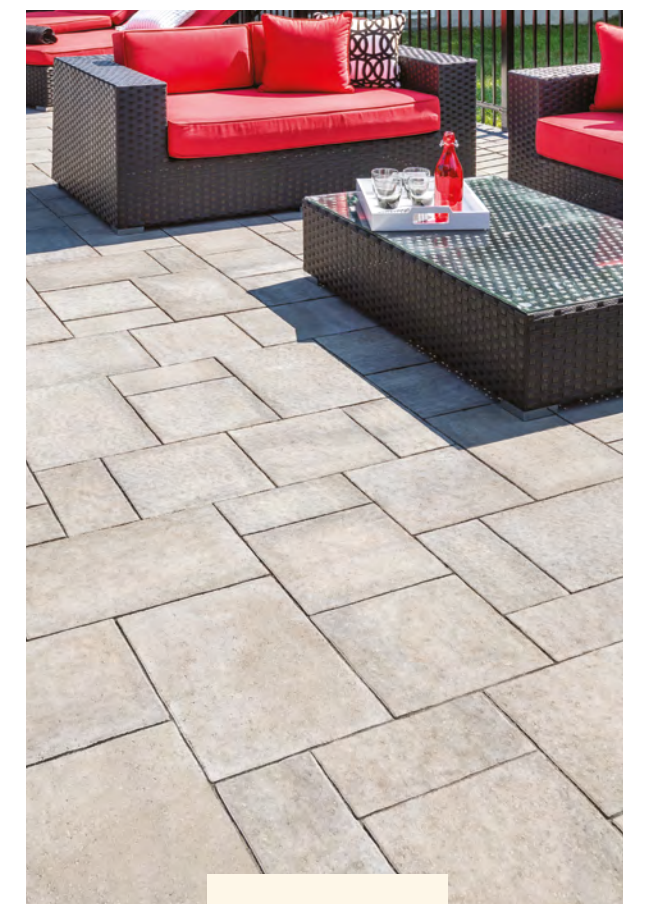

Straight lines or irregular ones? Are you wondering which look to adopt for the alignment of your pavers and slabs? There's no wrong answer. It depends on the design concept and your personal preferences.

Rinox offers many different pavers or slabs that allow for either linear or modular installation. In general, a linear installation is often associated to the modern and refined look. On the other hand, a modular installation is more universal, adapting well to all styles. That being said, it is often seen that both installation techniques are used within the same project.

## Create a modern area that requires little maintenance

You've imagined a backyard made completely out of concrete... Why not? Fear not, this trend is becoming more and more popular. Its biggest asset is that it requires very little maintenance, not to mention you can say goodbye to your lawnmower!

Moreover, in order to add a creative and dynamic touch, lay the slabs in an infinity pattern. Doing so will create a grandiose effect in your backyard.

Satisfaction with your hardscape project is dependent upon best practices.

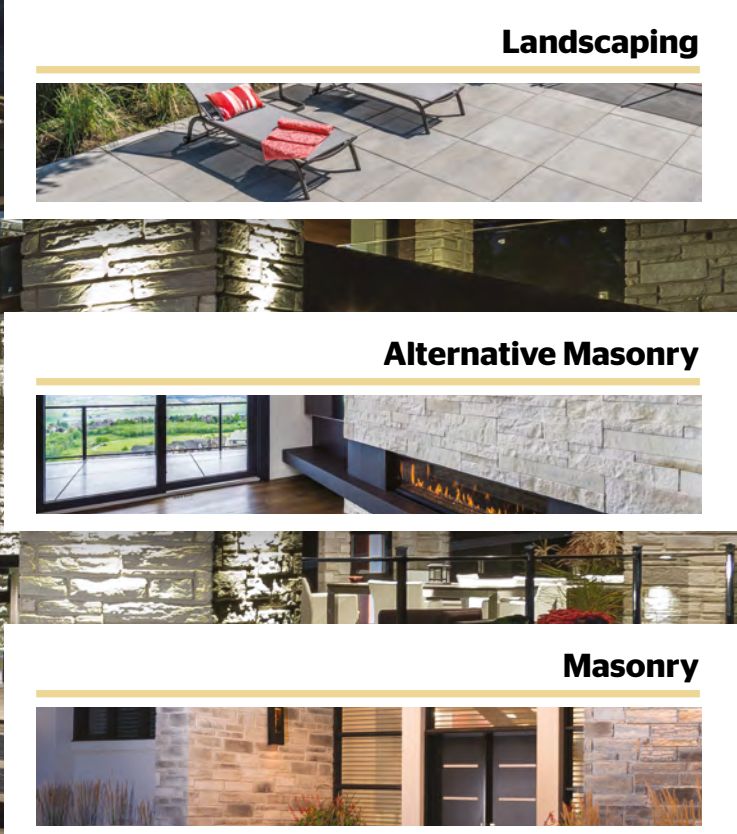

**Recommendations for hiring a professional installer:**

- Installation experience of a minimum of 10,000 square feet
- 2 year installation warranty
- Verify insurance and applicable licenses
- References

**Send us your request by email at [info@rinox.ca](mailto:info@rinox.ca)**

At Rinox we pride ourselves in our industry leading customer service, vibrant colors, superior product quality and our lifetime warranty. Rinox offers a lifetime warranty for all its concrete products provided that the products are used and installed according to standard building codes, Rinox installation guidelines and/or accredited association installation guides (ICPI, NCMA, AEMQ). The Rinox lifetime warranty is provided to the original owner with proof of purchase. It is applicable solely on Rinox products and excludes all labour and installation fees. If it is determined that a product is covered under warranty, Rinox will replace the product only (excluding all labour). There are no warranties or guaranties, expressed or implied, of any nature whatsoever, including without limitation, any implied warranty of merchantability or fitness for a particular purpose with respect to this product.

#### **INSTALLATION OF OVER 100 SQ.FT OF PRODUCT CONSTITUTES PRODUCT TEXTURE AND COLOR ACCEPTANCE**

The customer is encouraged to pick and install from multiple skids under the same lot to ensure proper color dispersion. Rinox produces its concrete products from natural materials and slight variations in color may occur; therefore Rinox is not responsible for any variation in color. Efflorescence (small white crystals that may form on the surface of concrete products) is a naturally occurring process that dissipates over time. Chemicals can accelerate the aging process, however natural weathering is recommended.

While our wetcast product line (Alternative Masonry products, Lugano Stone, Japanese Stone and Garden Stone) does conform to the latest Canadian and U.S.A. standards, we do not suggest the use of sodium chloride on such products.

#### **IMPORTANT NOTE: COLOR**

The colors of the products shown in this brochure are as accurate as the photographs and printing process will allow. We strongly recommend that you make your final color selection based on an actual product sample rather than on the photographs shown here.

*It is possible that after printing, certain characteristics have been modified. Obtain more information at your local dealer.*
